PREMIUM WINE BY THE GLASS

THE CORAVIN SYSTEM

The Coravin System was designed in the US and prevents wine from oxidising as no removal of the foil or cork is required, which leaves the wine untouched for future enjoyment. A thin hollow needle is inserted through the cork to access the wine. The bottle is then pressurised by Argon, an inert gas that has no effect on the wine.

The wine can then be poured through the needle. Finally, the needle is removed and the cork reseals, protecting the wine from oxidising.
